

MA. LYN GAMBOA

Software Engineer

Profile

Proficient in React, Node.js, and NestJS, with expertise in building scalable and efficient applications. I thrive in dynamic environments, combining technical know-how and problem-solving to deliver impactful business solutions.

Work Experience

2021
-
Present

DNA MICRO SOFTWARE INC.

Software Engineer

- Developed and maintained full-stack applications using React.js and Node.js
- Engaged directly with clients to gather requirements, provide updates, and ensure solutions met their needs, enhancing client satisfaction and project alignment.
- Developed a portal for sensitive customer data, implementing best practices for security and compliance.
- Developed an integration platform for a travel client, ensuring compliance with **XML OTA** standards for improved system interoperability.
- Developed server-side logic and API endpoints, improving system efficiency and scalability.
- Collaborated with a team to select technologies that met business and technical requirements, leading to a streamlined development process.
- Enhanced a React.js-based web portal's performance by implementing best practices such as code splitting, memoization, lazy loading, and efficient state management, securely handling sensitive data.
- Coordinated with QA teams to identify and resolve issues, ensuring high-quality deliverables.
